

AI-POWERED CAREER OPPORTUNITY ASSISTANT

Submitted By: Tripti Kumari

Internship ID: 2026AICTECSRBOX1535

Project Overview

This project presents an AI-powered workflow system designed to automate the process of identifying and filtering job and internship opportunities from emails.

The system uses automation and AI agents to read incoming emails, extract relevant job-related information, evaluate opportunities based on user preferences, and store the results in a structured format for easy tracking.

The workflow is built using an automation pipeline and incorporates intelligent decision-making to reduce manual effort and improve efficiency in job search management.

Key Features

- Automated email processing using workflow automation
 - AI-based extraction of job and internship details
 - Personalized filtering based on role, salary, and preferences
 - Decision-based classification into relevant and non-relevant opportunities
 - Structured storage using Google Sheets
 - Edge case handling for missing or irrelevant data
-
